Chinese New Year WebQuest

This web quest guides students in discovering information about Chinese New Year. Throughout the quest, students will visit four different websites to read, research, and share the information they learn. The product contains a thirteen page web quest along with an accompanying answer key. Quest tasks include exploration, research, literal comprehension, identification, description, inference, retelling, cause/effect, application, connection, reflection, written expression, and illustration. The Chinese New Year WebQuest is an excellent way to build students' comprehension, research, and technology skills in an engaging activity. It can be used individually, in partners, in small groups, as homework, or as a whole class activity. In addition, the activity is designed so teachers can use the whole quest or select individual sections. The last activity of the quest can also be used for a bulletin board display.

"Lies, Thieves, and DNA" - youtube
A History of DNA Discovery

Biology

- 1869- Discovery of Nucleic Acids
- 1910- Levene: Discovery of DNA Components
Bases:
Nucleotides:
Proposed a "Tetranucleotide"
- 1928- Fredrick Griffith
First to demonstrate bacterial transformation

1944- Avery, MacLeod, McCarty
Demonstrated the cause of Griffith's Experiment
Took the strains and mixed them with 2 enzymes:
Proteases.

1944- Journal of Experimental Medicine
Paper suggests that _____ rather than _____ may be the hereditary material of bacteria- and perhaps higher organisms as well.
